Scott Farm Seed Company

Mechanicsburg, Ohio

Dear Scott Friend:

Another holiday season is past, a new year is here and we're ready to roll up our sleeves and fly into the work of 1950. For eighty years now SCOTTS have been trying to have cleaner, higher quality seed than is usually available elsewhere and, in addition, we have tried to be among the first to have many of the new varieties and kinds of seed.

Over the past few years it's been Midland and Cumberland Clover, Ranger and Buffalo Alfalfa, Certified Bromes and Ladino, Clinton and Clinton 59 Oats, Lincoln and Hawkeye Soybeans, Butler and Vigo Wheat and many others. Now this year it is Kenland Clover, Atlantic Alfalfa, Madrid Sweet Clover, Clinton 11 and Andrew Oats, Monroe Soybeans and, by fall, Seneca Wheat.

There has been no particular change in the seed situation since our letter of the December 1st price list. Possibly Sweet Clover has shown up a little shorter than expected as has also Brome Grass. Generally we feel prices will remain steady with but few advances.

We have felt that many farmers would need seed Oats this year as the 1949 harvested crop was below average in yield, test weight and quality. Clinton 59 and 11 are essentially equal in all respects and are a little more uniform in ripening and in height than Clinton. Mindo, Columbia and Andrew are earlier and better suited to the southern oats territory. Our supplies of most are good but don't wait till the last minute to order seed Oats.

In SCOTTS meadow and pasture mixtures you will find a nice balance of legumes and grasses. Experiment Station recommendations have been followed and seed equal in quality to the items listed separately has been used. The seed is thoroughly mixed, convenient to order and sow and should produce a top quality meadow or pasture.

The new hybrid corn bulletin contains a description of the hybrids listed along with some planting tables and other information. Reports continue to be very favorable to the SCOTT Hybrids. Select one or more suited to your farm and plant at least a part of your acreage with it. In addition to the Ohio Certified varieties listed we can get the new hybrids or any of the older ones for you.

Soybean seed demand may be greater than last year, especially if corn allotments are set. Monroes are early and intended for northern areas or where planting is late. Hawk-eyes are high yielding, medium in maturity and suited where wheat is to follow. Lincolns are medium late, high yielding and have taken the place of the older full season varieties. Orders will be accepted at any time for later shipment and inoculation is furnished with beans at no additional charge.

Sincerely Yours,

It's Time To Order Seed.

TREATED HYBRID SEED CORN

SCOTTS Hybrid Corn has been graded for width, length and thickness and will plant easily and accurately in any make of planter. Ohio certified Hybrids not listed are available upon inquiry.

The round kernels are graded uniformly and will yield just as well as the flats but special plates are usually required for accurate planting. All corn is treated for added protection against disease.

SILAGE BLENDS—FLAT KERNELS (EARLY or LATE) —\$6.00 bu.

ROUNDS—Only medium and large rounds are offered. Carefully graded, high in germination, produce strong plants, and will yield as well as flats at a saving in seed cost. The same grades are available each year.

SCOTTS 11—Slightly earlier than Ohio M-15. Large ears for an early hybrid. Has out-yielded Ohio M-15. Sound dark yellow ears. Suited to short season or late planting.

SCOTTS 22—The maturity of Ohio M-20 and M-34. Has outproduced its maturity class on many different farms. Good roots, sound ears, good quality fodder, dries out quickly.

SCOTTS 33—Maturity of K Hybrids. A real producer with disease and smut resistance. Easy husking, nice fodder not as tall as K-24. Will pick clean and crib early.

SCOTTS 66—One of the best medium maturing hybrids in the corn belt. Disease resistant, husks easily, strong roots, high yields on a wide variety of soils.

SCOTTS 75—Slightly earlier and not quite as tall as most of the C Hybrids, blight resistant, sturdy stalks, large dark yellow ears, bred for handy size and high yields.

SCOTTS 99—Maturity of U. S. 13 and bred for more corn borer resistance and higher yield. Dark green color. Not quite as tall as U. S. 13. Good sized, sound ears.

EARLY SILAGE BLEND—A blend of the earlier maturing hybrids for short season use. Seed is uniformly graded and above 90% germination. Will plant 8-10 acres per bushel.

LATE SILAGE BLEND—A blend of the later maturing hybrids recommended for full season planting. Slight variation in maturity gives high yields of balanced quality feed. May be used for crib corn.

SPECIAL OFFER

One peck of medium flat kernels of any SCOTT Hybrid selected will be furnished FREE of charge for each 3 bushels of corn ordered in January.
